*During ballot processing, election judges verified the signature on an unaffiliated voter's return envelope. Upon deconstruction, the return envelope contained a marked Democratic and a marked Republican ballot. The election judges should have returned both marked ballots to their return envelope and changed the envelope's status from Accepted to Rejected-Returned More than One Ballot. Instead, the election judges erroneously prepared both marked ballots for scanning. At the time the error was discovered, the marked ballots had been dissociated from their return envelope, making it impossible to identify the voter in question or the ballots that should not have been counted. The unaffiliated voter's return envelope remains in accepted status, resulting in one more ballot counted than voters who voted. The error does not materially affect the integrity of the 2026 Primary Election because it did not and could not have changed the outcome of any primary election race at the county, district, or state level.
